

Pandas Course Description :

- 1. Introduction and Installation**
- 2. Pandas Data frame and Pandas Series**
- 3. Different ways of creating Data frame**
- 4. Handling with Missing values**
- 5. Group By functions**
- 6. Concatenation of Data frames**
- 7. Merging of Data frames**
- 8. Pivot table**
- 9. Reshaping of Data Frame**
- 10. Stacking and Unstacking**
- 11. Cross tab**
- 12. How to read data from database**
- 13. How to handle larger datasets**

Projects involved :

- Live demo on data analysis using Pandas project – 1**
- Hand's on Mini Project on Data analysis using Pandas Project – 2**
